Abstract (en)

[origin: WO2004113656A1] The invention relates to a safety strip for use as a switching strip for a striking edge safety device or closing edge safety device or a safety mat having an electrical switchgear. Said safety strip comprises contact elements arranged inside receiving elements. When an external force acts upon the receiving element it changes its shape and when the external force abates the element returns to its shape in terms of dimensions and angles it had before the force acted upon it, i.e. the element is elastic.
