Abstract (en)

[origin: FR2856165A1] The device has a processing unit including a file system (30) in which data from a set of sensors (26) which measure the quantity of a product, is stored. The processing unit also has an algorithm manager (32) to organize the storing of the data in the file system and to manage the restitution of the data. The file system and the algorithm manager are loaded in a medium (34). An independent claim is also included for a system for monitoring products by control of the evolution of the quantity associated with the products.
