Abstract (en)  
[origin: FR2856214A1] The system has a central case integrated in a vehicle (1) for covering a transmission/reception range (8). Individual cases are carried by passengers (5,5',5'',22). A local area network (LAN) exchanges information between the individual cases present in the transmission/reception range and the central case. The individual cases are connected to the LAN on entering the range.
