Abstract (en)  
[origin: EP1634526A2] The central arm (4) is attached with one end to a hollow central shaft (3) serving as a water and rinsing fluid supply duct and positioned either at the bottom or at the ceiling of the dishwasher housing (2). A second arm (6) is swivel mounted (5) with its center to the outer end of the central arm (4) and provided with several nozzles (7) at both ends. When the fluid is released a thrust is created moving both arms (4, 6) in circles around their individual axles (3, 5).
