Abstract (en)

The kit has a unit (7) connected to a unit (9) by a link (8) around an axis such that the units (7, 9) are displaced with respect to each other between two positions. An applicator unit (3) having a part (14) is immobilized in one position between the units (7, 9) and is detachable in another position. A sealing cap seals the unit (3) in the former position, when the unit (3) is immobilized between the units (7, 9).
