Abstract (en)

[origin: EP1635011A2] The facade or transparent roof construction for a building with an assembly device and especially a scaffold anchoring device has a support profile (1) upon which are fastened flat surface elements by means of pressure profiles and/or sandwich profiles, whereby on at least one part of the support profile (1) screw slots (9) are formed for fastening of the pressure profiles or sandwich profiles. The assembly device has an adapter (12) fastened to the screw slots for fastening of the pressure profiles or sandwich profiles. At least one mounting is installed or formed on the adapter designed for at least the anchoring of the scaffold. An independent claim is included for an assembly device and especially a scaffold anchoring device for a facade or transparent roof construction.
