Abstract (en)

[origin: EP1635110A2] A building façade element designed to be inserted in a façade frame to be basically coplanar with other elements making up the façade surface includes at least one panel (13) movable between a position virtually coplanar with the façade surface (11) and a position protruding from the façade surface and contains a light source (14) designed to illuminate the exterior of the façade when the movable panel (13) is in the protruding position.
