Abstract (en)

[origin: EP1635118A2] The chamber has a carrying structure (12) for a chamber lining (16), and spaces (18) that are formed between the structure and the lining. The chamber lining includes shingles (20) that are made of a fiber-reinforced ceramic material. The shingles include a plate (22, 24) that is oriented partially transverse to a shingle surface facing a hot expansion space. The shingles are held at the structure by the plate.
