Abstract (en)

A method for preparing a food product in a culinary apparatus controlled by a control unit, comprises subjecting a selection of ingredients to a sequence of operations prescribed by a recipe; during said preparing, said control unit generates a message that requires an operator to introduce at least an ingredient of said selection, so that said culinary apparatus can run on said at least an ingredient an operation of said sequence. A method for heat-treating a food product in a culinary apparatus controlled by a control unit, comprises subjecting said product to a heat cycle having at least a treatment parameter; said control unit receives as an input information relating to said product and selects the value of said at least a treatment parameter on the basis of said information.
