Abstract (en)
Near to one end, a connection block (1) has a level separating surface (2) to act as a linking surface. Near its end opposite the level separating surface, the connection block has a fastening device (3), i.e. a threaded stem (4) that forms a single-piece part of the connection block. Independent claims are also included for the following: (A) A method for producing a connection element for printed circuit boards; (B) and for a tool for pressing in a connection element.
