Abstract (en)
[origin: WO2004112542A1] A device for detachable suspension of baskets (7), shelves (8), paper roll holders (9) etc. from a door or the like (2), comprising a carrier element (3) with through slots or holes (6, 6A, 6B) for holding the baskets, shelves etc., a first fastener (4) and a second fastener (5), which fasteners (4, 5) carry the carrier element (3) and are adapted to be fixed to the door or the like (2). Each of the first (4) and second (5) fasteners comprises an L-shaped element (11, 31) with a first leg (12, 32), which is adapted to be engaged with one edge side (13) of the door and its opposite edge side (33), respectively, and a second leg (14, 34), to which the carrier element is fixed in suspension. A first hook portion (35) is movably attached to the second leg (34) of the first fastener (4), and a second hook portion (16) is immovably attached to the second leg (14) of the second fastener (5). By moving the first hook portion (35) away from the second hook portion (16), the carrier element (3) is clamped to the door (2).
