Abstract (en)

[origin: WO2004113619A1] A roadside post (10, 110) comprises an elongate body (30, 130) formed of sheet spring steel. The body (30, 130) has a longitudinal axis (L), a front face (31, 131) and a rear face (33, 133). The body (30, 130) is elastically bendable through 90° from an unbent state about a transverse axis (T) transverse to the longitudinal axis (L). The front and rear faces (31, 131, 33, 133) transversely extend generally parallel to the transverse axis (T). The roadside post (10) may further comprise a rigid base (20).
