Abstract (en)
[origin: EP1637045A1] the sleeping bag is closed at the bottom (2) and open at the top (1) and has on the sack part (3) fasteners for fixing on a further outer sack part (6) so that the inner sack part is then enclosed at least in part by the outer sack part. The fasteners can be press studs, touch and close fasteners or slide fasteners and run round the inner sack part so that the inner and outer sack parts connect with each other on all sides. The inner sack part can be designed with long sleeves.
