Abstract (en)  
Window frame assembly made from profiles, where said assembly comprises a first outer frame adapted to be fastened to another building element and a second inner frame, which second frame is openable in relation to the first frame, and that said second frame comprises means for holding a window glass pane, for example double- or triple glazing window panes, where the panes are arranged in parallel at a certain distance, and that the distance is maintained by spacers, wherein the profiles are made from a composite material comprising fibres and a resin.
