Abstract (en)

[origin: EP1638383A1] A plug-type connector inserts into a first type of opening. A cable (20,22) passes through a second type of opening. The first type of opening is sealed by a wall-type insert (26), in which there is the second type of opening. Each insert fastens the cables on a casing (10) of zinc die-cast material. An independent claim is also included for an insert for a casing for sealing an opening for inserting a plug-type connector.
