Abstract (en)

[origin: WO2005005690A1] The invention relates to a method for producing an erosion-resistant protective layer. According to the invention, at least one paint material is provided that consists of a phosphate or silicate mixed with particles. Afterwards, at least one layer of the or each paint material is applied to a part to be protected against erosion. The or each applied paint layer is subsequently transformed into a glass layer.
