Abstract (en)

The invention relates to an installation (10) for realizing magistral preparations, which contain determined weights of a plurality of given ingredients, each of said ingredients being contained in a reservoir (18) that has an identification marking, said installation (10) comprising weighing means (12) and receiving means (14) suitable for mounting on said weighing means (12), the ingredients being delivered into said receiving means (14) for each of said reservoirs (18), said weighing means (12) providing a weight value of ingredient delivered, said installation comprising: means for identification (20, 17, 19) of the reservoirs; means for transferring (16) reservoirs into a distribution position; means for distributing (36) the ingredient from each of the reservoirs into said receiving means, and means for controlling (22) said transfer means (16) and said distribution means.
