Abstract (en)
The crash barrier arrangement has several profile posts anchored or anchorable in the ground, at least one barrier rope running along its long axis and at least one spacing element by which the rope is coupled to the posts. It has at least one spacing element, deformable on impact, between a post and a rope on the road side. At least one spacing element is bordered in the direction of the long axis by an area beside or near the respective profile post, and in the direction orthogonal to the long axis is bent in a middle area between the base and contact sections.
