Abstract (en)
[origin: DE102004043128A1] The device has a frame (1) fastened on a ship-jack-up rig for encompassing and guiding a post (5), when ramming the post in a benthic division. A nozzle assembly (7) of a blowing device, which can be lowered from an upper standby position underneath the frame into an operating position at the benthic division, is attached at the frame. The pile is annularly bordered in a blowing operation. The assembly has pipes with exit openings.
