Abstract (en)

[origin: EP1640927A2] The invention concerns a locking device, which has a locking mechanism (2) that can be unlocked by means of a portable transponder (4-6). Said locking device has an audio output unit (11), which outputs phrases stored in a memory (13), depending on the program step. Said phrases serve as information for a person programming the locking device i.e. input or deletion of locking rights as well as maintenance information.
