Abstract (en)
[origin: WO2005002806A1] The invention relates to an electrical hair cutting appliance comprising a housing (2) and a carrier body for at least one cutting system (9, 10), said carrier body (8) being pivotably mounted on the housing (2) about a rotational axis (11). The cutting system consists of at least two blade elements (30, 31, 36, 37) that can be moved in relation to each other by means of a drive motor, and the carrier body (8) is mounted, on one side, on an outer side of the housing (2).
