Abstract (en)

[origin: WO2005002902A1] The invention relates to a display device for motor vehicles and a method for control of a display device for motor vehicles, particularly motor vehicles which require an additive in addition to the fuel for operation thereof, which is used up as a function of the fuel used and further driving parameters. By means of the inventive display device, the range of the additive reservoir is displayed with relation to the range of a full fuel tank.
