Abstract (en)

[origin: WO2005001226A1] The invention relates to a guide device for a sliding door, the latter being guided along a guide rail by means of a carriage. The aim of the invention is to provide a guide device of this type with a technically and optically appealing construction. To achieve this, the guide rail comprises an interior channel, in which the carriage is guided and the guide rail consists of two profiled sections that are detachably interconnected.
