Abstract (en)

An apparatus for stowing / storing objects in a raised position relative to a treaded surface, comprising at least one container (2), anchoring means preferably applied to a ceiling and means for actuating the container (2) from the raised position to a loading / unloading position at man height, and vice versa, said means for actuating the container (2) consisting preferably of articulated arms (4), each of which comprises a plurality of rod-like elements (7). A method for storing objects, which comprises the anchoring of at least one container to a ceiling and a step of actuating the container in a loading / unloading position at man height and back.
