Abstract (en)
Clamp (1) comprises a base part (2) having a manual incremental drive (20). An independent claim is also included for an incremental drive for the above clamp. Preferred Features: The drive has a tensioning lever (21) which moves to and fro and is arranged on a clamping part (3). The clamping part slides with its connecting rod (4) in the base part. The operating element of the drive is arranged on the base part so that it can be operated by the same hand of the user which holds the base part.
