Abstract (en)

[origin: EP1642844A1] The package has a sheet (F) that is impermeable to bacteria and permeable to sterilizing gas and used for packing a stack of sachets (3). The sheet presents a partially tearable rectangular sector (S) that includes two vertical sides and an upper horizontal side which constitutes a hinge to fold the sector as a flap on top of the package for removing the sachets. Independent claims are also included for the following: (A) a stack of sachets of medical products (B) a method for forming a package for medical products (C) a device for implementing a method for packing a stack of sachets of medical products (D) use of a package for a stack of sachets of drapes.
