Abstract (en)

[origin: EP1643064A2] The window has a drivable pinion that is supported at a fixed component. A rack is provided at a moving component and into which the pinion engages. The moving component flushes with the fixed component in a closed position of the window. The rack is made as a toothed cam and has a toothed arrangement with sections (17, 18) for the movement of the moving component along the fixed component and into the closed section.
