Abstract (en)  
Fixing device comprises a wedge (26) extending over the whole length of a groove and inserted between a blade foot (14) and a blade holder. The wedge is made from a material which acts as a spring element in the transverse direction of the groove. Preferred Features: The wedge has a structured surface on one side and is inserted on the lower side of the blade foot. A wedge-shaped recess receives the wedge and guides the wedge in the direction of the groove.
