Abstract (en)
In the lottery process (S12) in the slot machine 1, the symbols displayed on the variable display portions 21 to 25 and the winning symbol combination are determined. Among the symbols constructing the winning symbol combination, one symbol is substituted for the other symbol and it is referred whether or not the other winning symbol combination is realized. Based on the reference result conducted every the display position of each of the symbols constructing the winning symbol combination, the number of the winning symbol combination realized and the total payout are stored in the RAM 52, and based on the data stored therein, the display position of the symbol "BLANK" is determined. And in the stop control (S42) of the slot machine 1, it is conducted variable display in which the symbol "BLANK", the symbol "WILD", the symbol constructing the winning symbol combination and the symbol constructing the other winning symbol combination are sequentially changed and displayed.
