Abstract (en)
The heating element for a warm air device consisting of a support component (2), a contact pin carrier (3), and a protective disc (4) which are orientated in relation to each other via at least one one-piece anti-twist element (8) passing through the support component over its whole length. A locking pin (9) of the anti-twist element is inserted loosely in a channel (17) in the heating element and is enclosed in the heating element by the contact pin carrier and/or the protective disc.
