Abstract (en)
[origin: WO2005006915A1] The invention relates to a toothbrush (1) comprising a head (2), on one surface (10) of which tufts of bristles (11-17) protrude. According to the invention, at least one tuft of bristles (11) is surrounded by an annular depression (21) that is embodied on the surface (10), resulting in an increased mobility of said bristles, thus allowing the same to more easily invade and better clean the interdental spaces.
