Abstract (en)
[origin: WO2005004728A1] The invention relates to an aiming device (1) which is used to guide and place longitudinal bone fixing means (4) in a predetermined direction with respect to a bone fixing device (6). The aiming device (1) comprises securing means (5) which can be detachably secured to a bone fixing device (39). The aiming device comprises A) a first centering part (13) which can be placed on the bone fixing device (39), and a second centering part (3) which is arranged at a distance from the first centering part; B) both of the centering parts (13;3) comprise at least one pair of guiding elements (14, 29) which are arranged in a coaxial manner in relation to each other.
