Abstract (en)
[origin: WO2005007058A1] The invention relates to a device (1), for stretching the human body. According to the invention, a simple and mobile device of said type can be achieved, whereby said device comprises detachable pieces of a couch or a bed (2), head- and base-end supports (17, 19) for the human body, by means of which the human body is fixed between both fixing points (14, 15) and at least one of the supports (14, 15) can be subjected to a force which acts in the longitudinal direction of the couch or bed (2), against the resistance of the human body.
