Abstract (en)

[origin: WO2005005276A1] Packing wrap (1) for a packing-configured individually packed absorbent article (2), such as a sanitary towel, a panty liner or an incontinence pad, intended to enclose the absorbent article (2), comprising a first material piece (3) arranged over the first surface of the absorbent article (2) and a second material piece (4) arranged over the second surface of the absorbent article (2), comprising an opening location (5) having a longitudinal extent, and comprising means (12) for tactile detection of the opening location, the means (12) for tactile detection being arranged adjacent to the opening location (5). The means (12) for tactile detection has a longitudinal extent, the means (12) being arranged essentially parallel to the longitudinal extent of the opening location (5).
