Abstract (en)

[origin: WO2005015887A1] The invention relates to a method for provision of audio content, said method comprising a step of production of audio content, transmitting the same by means of a telephone terminal (10) and a step of reception (20) and generation of a copy (32) of said audio content for subsequent consultation by a telephone terminal. Said method is characterised in comprising a step for production of the audio content by means of the telephone terminal (10) which precedes in a temporally-distinct manner said transmission step for said audio content by the telephone terminal.
