Abstract (en)

The production machine for paper cushions has a deforming device (22, 22', 22'') and a drive in a housing (2), which pulls a paper web (8) through the deforming device, and forms a cushion from the paper web. The housing contains a shaft (50), which serves as a drive for a drive wheel (68). The drive wheel may be able to turn relative to the shaft against a spring (74).
