Abstract (en)

[origin: EP1645531A1] Device for isolating flat objects from a pile of pressure plates (4) by suction through suction element of lifting device (6) which is part of form element (7) that operates in a confined boundary (11). Suction is created in Form element by airflow (5) which has recess (13) and airducts (14). An independent claim is also made for the procedure for isolating pressure plates from a pile.
