Abstract (en)  
[origin: US2006072967A1] A transition structure between two different restraint systems with different compliances set up along roads is configured such that the restraint systems are connected with each other, on the one hand, and, on the other hand, the system with greater compliance comprises damping elements ( 20 a- 20 i) reducing the compliance section by section and being arranged on the side averted from the roadway.
