Abstract (en)

[origin: EP1645699A2] A nosing for steps having a continuous angular profile made up of a single piece, the sides of which are intended for making up a portion of the tread, and the other, a portion of the riser, the inner edge having as an extension of the inner face corresponding to the tread a deep and narrow groove that allows for the introduction of a longitudinal member allowing the perfect alignment of the different step nosings making up each step.
