Abstract (en)

[origin: EP1645714A1] The frame and filler unit (100), in particular, in the form of a window or a door comprises a holding element (130) keeping the filler (110) joined to the frame (120) when the filler is forced out of the frame opening as a result of an explosion. The filler is removable from the frame only when the connector element (150) is broken.
