Abstract (en)

[origin: EP1645833A2] The sighting device (1) for a firearm (2) has an indicator device, part of which is a measuring device for the range of the target. This appears in the field of vision of the firearm use of. At least one other part of the measuring device is not in or on the sighting device. The sighting device has a cut point (11), where those components which are connected to the sighting device are fitted. The measuring device may be included the receiver (9) for an optical signal (8) coming from the direction of the target.
