Abstract (en)

[origin: EP1495692A1] The strap (1) with a buckle (3) and prong (4), also includes transverse holes (25a-f) over a limited part of its length, with a last hole (13) at the end. Each hole has an associated slot (26a-f) cut through the thickness of the strap, to accommodate the prong. The strap can be shortened by cutting along a transverse section (27a, 27b). The transverse pivot bar and prong of the buckle are then held in the last hole in line.
