Abstract (en)
[origin: WO2005000642A1] Disclosed is a windshield wiping device for a motor vehicle, comprising at least one molded tube (10) for accommodating a drive shaft that drives at least one wiper arm. The at least one molded tube (10) can be joined to a holding element (11) that can be connected to the body, and a butt (12) which receives a tubular plate. Connecting webs (14, 15) are provided for joining the at least one molded tube (10) to the holding element (11) and/or the butt (12).
