Abstract (en)
[origin: WO2005010249A1] In order to avoid the need to change the oil in ring spinning spindles (1), the invention provides that the neck bearing (8) and footstep bearing (9) of the spindles are equipped with lifelong-lubricated roll bearings (8, 9), and they are to be placed inside oil-tight bearing sleeves (13, 14), which are accommodated inside the bearing housing (2) via damping spirals (16, 17) and are located in damping oil (18).
