Abstract (en)

[origin: US2007095043A1] A machine comprising one or several processing stations, integrates in a combined and successive manner, according to a same work position: a spindle for twisting and/or cabling a yarn, thermosetting apparatus comprising a rotating heating godet, followed by an accumulator capable of cooling and relaxing the yarn in a totally free state, without tension, and a bobbin for winding the yarn, the bobbin being secured to yarn guiding and driving bodies.
