Abstract (en)  
[origin: WO2005009178A2] A merchandising system for articles having a front and rear comprising a first divider, a second divider, a third divider, a first connector and a second connector. The first connector is positioned between the first divider and the second divider, the first divider is coupled to the second divider, the second divider is coupled to the third divider, and the dividers comprise guides configured to provide support to the articles as the articles move between the rear and the front of the system.
