Abstract (en)

[origin: DE10323557B3] The rear windscreen antenna (1) has an antenna structure (2) and an antenna lead (3) applied to the surface of the windscreen panel at the peripheral edge of the latter, which is provided with an outer black edge zone (9) and an inner graduated edge zone (10), with clear openings (11) of increasing size, using a non-conductive printing material. The antenna structure lies within the inner graduated edge zone and is arranged to fit in the opaque intermediate areas (13) between the clear openings.
