Abstract (en)

[origin: EP1647199A2] Packing device for cosmetic product, comprises a cavity and an applicator having a portion which cuts the fibrous material/carton support and integral of the support. The cavity (3) has a mechanical and/or thermal deformation by embossing the fibrous material/carton (2), where the cavity has a bottom wall (42) of thickness (e F) is lower or equal to the nominal thickness (e S) of the support, which is placed around the cavity. The applicator (7) has a flock (40), foam or a felt, which is connected to the support by a frangible zone (10) and extends into a window (8), comprises an attenuation foldable line (36). An independent claim is also included for a method using the above device.
