Abstract (en)

[origin: EP1647202A1] The brush has bristles projecting outwards from an oblong core. The bristles have varying lengths such that a number of longer and shorter bristles, by their tips, form an outer envelope (9) and an inner envelope (11), respectively. The envelope (11) of the shorter bristles is one of a conical, double-conical, convex and concave and combination. The bristles are fixed between intertwined wire sections. An independent claim is also included for a method for the manufacture of a mascara brush.
