Abstract (en)  
[origin: EP1647213A1] A manual switch has selector switches/buttons (1-5) for adjusting the type of adjustment process and direction switches/buttons (up,down) for adjusting the direction of the adjustment process. Near each selector switch/button there are luminous diodes (L1-L5) and an extra luminous diode (L6) on the top of a casing. The manual switch can link to a bed via a cable. An independent claim is also included for a sick/care bed with a manual control switch.
